

READING
CLOUD

FOR SCHOOL STAFF

Reading cloud is a leading library management system with an innovative online pupil engagement community which helps schools promote reading for pleasure and helps children develop positive attitudes to reading to become lifelong readers.

User-friendly Interface

Tried and tested functionality that's intuitive and engaging for both students and staff.

Handy Dashboard

All the key statistics and information you need on library usage available in one central view.

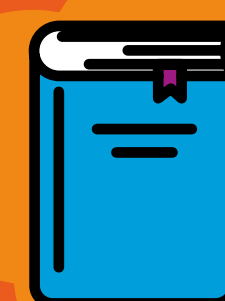

Anytime Anywhere Access

Reading Cloud can be accessed from all web-browsers on any device.

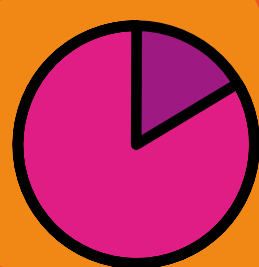

Catalogue Enrichment

Access the latest bibliographic data for book details and images, eBooks, weblinks and author video clips.

Reading Lists

Create targeted reading lists for your reading groups, classes or individuals. Students can also create their own reading lists.

Insightful Reporting

School Inspection, Top Readers, Most Popular Books, Never Borrowed Books and Stock Value reports, all available at the click of a button!

Nominate Student Librarians

Help build a child's confidence, sense of responsibility and encourage independent learning with Student Librarians.

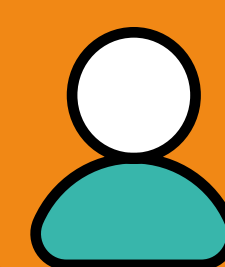

Develop Information Literacy & Research Skills

Encourage students to search independently for books using keyword functionality.

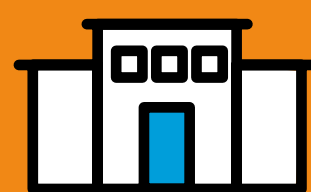

Promote Safe Networking*

Students can experience social networking in a safe environment and create their own online profile, write and share blogs, chat and create home libraries.

Encourage Parental Engagement

Parents can easily monitor their child's reading progress and get involved with their reading at home.

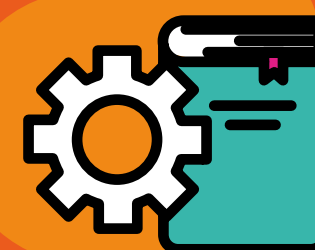

Raise the Profile of your Library

Add a link to Reading Cloud on your school website to encourage students and parents to access their library from home.

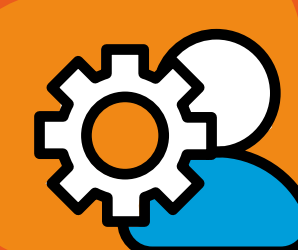

27% Discount for Peters online bookshop

Access the expert school library book provider's online bookshop through Reading Cloud and make the most of your exclusive discount!

Integrate with Accelerated Reader

Pupils can check the AR levels for the books they're interested in and go to take AR quizzes from within the Reading Cloud online community.

Integrate with your Student Management Information System

Save time and ensure data accuracy with automated scheduled imports of student data from your MIS into Reading Cloud for each new cohort.
